[20]

(3) All questions carry equal marks.

(4) Assume suitable data, if required and state it clearly.

Attempt any FOUR

What are the applications of 3D solid CAD model.

Determine the coordinate of a 3D point P (5, 7, 9) when rotated by 30 degree in CCW

Explain the use of RP in biomedical field.

Briefly explain the elements of NC Machine Tool System with neat sketch. Compare Bezier Curve and B-Spline Curve.

co-ordinates of the vertices for the reflected triangle.

A cubic Bezier curve is defined by the control points as (20,20), (60,80), (120,100) and (150, 30). Find the equation of the curve and its midpoint.

Explain Fused Deposition modelling with its advantages, disadvantages and applications. 3 a A triangle PQR with vertices P (2,5), Q (6,7) and R (2,7) is to be reflected about [10] the line y=0. 5x+3. Determine (i) the concatenated transformation matrix and (ii)

Explain the major steps involved in rapid prototyping list the various rapid [10] prototyping techniques and explain any one of them with neat sketch in brief 4 a Explain in brief the elements of CNC machine tool system. Write down [10]advantages, limitations and applications of CNC machine tool system.

b Write short note on 3D printing with neat sketch. [10]

5 a Write complete part programing for the forged component shown in following [10] figure by taking finishing cut of 1 mm.

b Explain the process of obtaining CAD solid model of body parts using CT output [10]

a Explain in brief Augmented Reality (AR) and Virtual Reality (VR). [10]Explain the concept of homogeneous co-ordinate system and its significance. [10]
