15/12/22

F. E. Sem II. (C Scheme, R-2019) Nov Dec 2022.
All Blanches.

Time:3 Hrs

Max Marks:60

Note :
- Solve any FOUR questions.
- All dimensions are in mm.
- Use First Angle Method Of Projection.
- Assume Suitable Dimension If Necessary.

Q.1 Following figure shows the pictorial view of an object. Draw
i)   Sectional front view along section A-A   [5]
ii) Top view.   [4]
iii) Right Hand Side view   [4]
iv) Insert at least 10 dimensions   [2]

Q.2 (a) A cylinder of diameter 50 and axis 65 mm long is lying on H.P on its curved   [6]
surface with axis inclined at 45° to V.P and parallel to HP. Draw the projections
of cylinder.

16287

22CD8DE2EA92ED2C2EE63485B424EAF9

(b) Draw the isometric view of the object whose FV and TV are as given below. [9]

Q.3 (a) The pictorial view of a machine part is shown in following figure.
Draw
   i) Front view from the direction "X"
   ii) Top view   [4]
   iii) Insert at least 6 Dimensions.   [4]
                                                                    [1]

16287   **Page 2 of 3**

(b)   One end of a string, AB, of length 140mm is wound round a disc of diameter   [6]
50mm by keeping one end, A, fixed on the disc and keeping the string always
tight. Draw the locus traced by the other end of the string B. Name the curve.

Q.4   A pentagonal pyramid, side of base 35 mm and axis 65mm long is resting on one   [15]
of its corners on HP such that one of the triangular surfaces is parallel to HP and
perpendicular to VP. Draw the projections of solid when the base edge containing
that triangular surface is parallel to both HP and VP. The apex of the pyramid is
being nearer to observer

Q.5   One end P of a line PQ is on HP and 25 mm in-front of VP while other end Q is   [15]
on VP and 50mm below HP. Draw projections of line PQ and find its inclinations
with HP and VP if the true length of PQ is 70mm.

                                                                                [8]

Q.6   (a)   The FV and TV of an object is shown below. Draw the Isometric view of the
object.

(b)   A hexagonal prism of side of base 35 mm and axis 65mm long is resting on one   [7]
of its base edges on HP such that the base of the prism is inclined 45 degrees to
HP and axis parallel to VP.Draw the projections of prism.
